

7. d. There are specific fund codes which should be used by units requisitioning Navy Type/Navy Owned (NTNO) equipment. These fund codes use a system data field to capture the costs associated with this program and must be established with the FINCEN through the budget offices. Budget offices should make sure that these are established for all units authorized to requisition this type of equipment. See Chapter 11 for further information.

FUND CODE	DESCRIPTION	SYSTEM DATA CODE

- e. Fund code "TD" is reserved for Industrial Inventory in appropriation XD6. Fund code "TE" is reserved for Industrial Projects in appropriation XD7.
- f. Fund code "AV" is reserved for all aircraft fuel. The object class is 2632. See page 12E-35 for details.

8. Miscellaneous Items:

- a. Units can make obligations (without requisitions) for miscellaneous milstrip orders made outside the ARMS system by creating Z0A documents in ARMS, or in Batch ARMS. Enter Z0A in the Document Identifier field of the requisition. The Z0A will post as an obligation to the PES report, but no requisition will be sent out to DAAS. A valid fund code charging the correct accounting line must be used. Z0A's entered without valid fund codes will not be obligated.
- b. When Z0A's are created for GSA CSC call in orders, the julian date from the Customer Bin Order Document must be the date used on the Z0A and must be entered into LUFFS with that same julian date in the document number.
- c. When ordering free issue items, only signal code "D" or "M" should be used on the requisition. Use of signal code "D" or "M" prevents the order from obligating. NOTE: If ordering ammunition from the Navy that is free issue to the Coast Guard and requires the use of fund code Y6, the signal code of "D" or "M" must be used on the requisition, even if called in to the Coast Guard representative.
- d. Valid fund codes should be cited on all documents dealing with OGA's. The FINCEN receives bills with these fund codes on them and charges the bills according to the fund code.

9. **Defense Transportation System Bill Processing:** Record transaction costs billed for shipment of government freight services provided by the Defense Transportation System (DTS) against each Transportation Control Number (TCN). This detail will be provided for most TCNs used in conjunction with standard Transportation Account Codes (TACs) as document type 35.
